

Canal Stage BUGA `97, Gelsenkirchen, Germany

In Gelsenkirchen, the roof of the main stand at Bundesgartenschau seems to be floating on water. An almost classic construction with two high points is sort of characteristics of textile architecture. With calm waters in the background this project can be seen to its best advantage without distracting from the actual action on stage.

Project data

Architekt / Architect	Dieter Flimm, Köln
Konstruktion / Construction	IF, Reichenau
Statik / Statical Calculation	IF, Reichenau
ÜGF / Covered Area	730 m ²
Baujahr / Year of Construction	1997
