

## Intergastra – Stuttgart and Hamburg 2006

Freeform production and installation in CENO Style stretch fabric and opaque surface design. Slightly differing executions of this exhibition structure are offered every year both in Stuttgart and Hamburg. The challenge consisted in finding an ideal interim solution in order to ensure the shaping on the one hand and the ideal light translucency on the other.

### Project data

Project description	Intergastra, Messe Stuttgart and Messe Hamburg
Principal /client	A & A Expo International, Wijk bij Duurstede, The Netherlands
Material	Freeform with CENO Style stretch fabric: CENO Style stretch light CENO Style stage moleton
