

Flower-Island Mainau: Island Entrance "Mainau Träff"

Roofing of the re-designed entrance area of the Mainau island. The structure covers a place which serves as a meeting point and where various buildings such as souvenir shops and cafes are arranged.

The membrane which is made of glass lattice laminate, consists of 2 central fields (stretched between 2 archs) and 2 corner fields (each connected to an arch and to articulated columns). All 4 fields have different dimensions.
