

## Konica Minolta at CeBIT 2006

On the occasion of CeBIT 2006, Konica Minolta presented themselves on four booth spaces separated by hall corridors. In order to integrate these joint faces into a homogeneous concept, a horizontally covered fabric facade was created. For this purpose, single CENO Style T – Lux 21 fabric widths - partly printed and provided with logos - were unwound over a support system.

Place of installation	Konica Minolta booth, CeBIT 2006
Principal / client	Konica Minolta, Langenhagen
Architect / Planning	Fricke inszeniert, Braunschweig
Design planning	CENO Membrane Technology GmbH
Materials	Fabric: CENO Style T-Lux 21 Construction: aluminium
