

Supersplash, Hansapark Sierksdorf, Germany

In the Hansapark recreation park, a water slide has been installed. The access and exit area was fitted with membrane roofing which in the plan view is reminiscent of splashing water. The incorporation of this idea in the all-over layout (anchorings, foundation points, etc.) represented an exceptional challenge.

Project data

Architekt / Architect	Ing.-Büro Teschner, Füsing
Konstruktion / Construction	Ing.-Büro Teschner, Füsing
Statik / Statical Calculation	Ing.-Büro Teschner, Füsing
ÜGF / Covered Area	450 m ²
Baujahr / Year of Construction	1996
