

ZGM Zimmermann, Graf & Müller – ProWein 2006

Production and installation of a two-piece textile ceiling construction made of CENO Style Stretch 03. Thanks to the favourable supporting properties of the CENO Style 3-channel profile, it was possible to reduce the required quantity of intermediate struts substantially thus giving the illuminated or backlighted elements a very nice appearance.

Project data

Project description	ProWein 2006, Düsseldorf – ZGM booth
